

# BETTER BROADBAND IN SUFFOLK MAKING A DIFFERENCE

## Hubble & Co

### Who are they?

Established in 1989, Hubble & Co is a private company specialising in fasteners of all varieties. With over 20 years of experience, they have built up an enviable reputation for their knowledge, customer service, pricing, comprehensive stock range and a fast, reliable delivery service.

### What are they doing?

Working primarily with oil and gas companies, the engineering trade and the building construction industry, Hubble & Co provide the industry with their great range of nuts, bolts and screws from their two branches in Great Yarmouth and Lowestoft. The company also now have their own web shop, allowing them to reach out to more clients at a quicker speed.

### How is superfast broadband making a difference?

Superfast broadband is crucial to the Hubble & Co web shop – without it, the two branches would find it challenging to send data from one to the other, let alone with businesses who are hoping to purchase from them. The ecommerce shop allows customers to access products and stock availability quickly, and serves as a great platform for future growth of the business.

### What do they think?

**“It is busy times for us as customers big and small recognise the importance of our specialist knowledge and comprehensive stock availability. Our web shop and ecommerce offer is crucial to keep that business and with superfast broadband we feel confident as we move forward.”**
