

BETTER BROADBAND IN SUFFOLK MAKING A DIFFERENCE LIFE SCIENCE/BIOTECHNOLOGY

Select Biosciences Ltd.

Who are they?

Select Biosciences Ltd. provides scientific consultancy services to the biomedical industry. In 2010, the company won the much-coveted Queen's Award for Enterprise, acknowledging their eleven-fold growth in overseas sales over six years. With the International Head Office in Sudbury, the company also communicates with their other offices across the globe.

What are they doing?

In the past six months Select Biosciences Ltd. have developed a new On-Demand Training Solution for the Life Sciences. The services is run on the company website, allowing people from anywhere in the world to access High Definition technical training videos. The videos themselves are exclusively filmed, edited and uploaded by an in-house production team at the company. They are the first company in the world to offer this online service to the scientific community.

How is superfast broadband making a difference?

With customers across the globe wanting to take part in their fantastic business and training courses, Select Biosciences can reach any customer worldwide by hosting their courses in HD videos online. By providing this service, Select Biosciences Ltd. is saving their customers money and time.

What do they think?

"Better Broadband for Suffolk is so important for many businesses, but for us in particular, it allows huge growth and progression for our company. Superfast broadband is crucial in providing our training and business courses in video form across the globe, without it, the service would not be successful."
