

AUGUST 2017 EDITION

Message from Cllr Jane Storey

Suffolk Better Broadband August 2017 Update

As I reported in the last newsletter, we are delighted to have recently moved above 90% coverage of superfast broadband across the county. Around 315,000 properties now have the option of using fibre broadband, an increase of more than 127,000 from when the Better Broadband for Suffolk programme started deployment in 2013.

While this is a major milestone, I would like to reiterate Suffolk County Council's commitment to provide high-speed internet access for all properties in the county – no-one will be left behind. To get closer to this aspiration, I am pleased to report that the County Council and Openreach have signed an agreement to extend the coverage to 98% of all properties during 2020, reaching around 50,000 more properties than previously planned. This new agreement to reach 98% is a big leap forward, and adds to the significant increase in broadband coverage since we started this work in 2010.

We are now facing the toughest challenge – how to connect the remaining 2% of properties, in the most remote locations in Suffolk, to ensure every Suffolk property, regardless of its location, can access high-speed broadband services. This includes lobbying Government to support full rollout to the most rural areas.

We are working with local communities in some of the more remote rural areas on innovative solutions to extending broadband coverage, including 'self-dig' schemes. One example is Baylham Stone in Mid Suffolk. The village of Baylham is due to get fibre broadband in the next few months, but the small hamlet of Baylham Stone, just over 1km away, was beyond the economic reach of the deployment plan. Residents got together and raised money to pay for a 'self-dig' scheme to route a fibre optic cable along a footpath joining the communities. Working with the local landowner, the self-dig was recently completed, and the residents of Baylham Stone will soon be joining those in Baylham in benefiting from high-speed broadband.

For those who would like an interim solution whilst the fibre rollout progresses, application forms for vouchers for satellite / Wi-Fi connections continue to be available on our website. Whilst this has limitations, it is a stopgap solution which we felt it was important to offer.

Increasing numbers of superfast broadband delivered to the county

Each three months, we are committed to providing an update on the areas which have been upgraded to superfast fibre optic broadband since our last bulletin, and those which are planned over the next three months. See the tables overleaf which summarise these. Our website map at www.betterbroadbandsuffolk.com will be updated by early September to reflect these areas.

Find out more about the Better Broadband for Suffolk programme by visiting our [website](#).

For any enquiries contact the Better Broadband for Suffolk team, at broadband@suffolk.gov.uk.
